

PIYUSH TIWARI

AI/ML Engineer | B.Tech AI @ AITD, Kanpur

GitHub: 30Piyush2025 | Location: Kanpur, Uttar Pradesh | Email/Phone: Available on request

PROFESSIONAL SUMMARY

Second-year B.Tech student in Artificial Intelligence with hands-on experience in ML, NLP, and generative AI. Passionate about building practical AI solutions and learning through project-based work. Self-directed learner with published projects on GitHub, currently interning in AI/ML/Data Science.

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence

Dr. Ambedkar Institute of Technology for Handicapped (AITD), Kanpur, Uttar Pradesh | Sep 2025 — May 2028 (Expected)

EXPERIENCE

AI/ML/Data Science Intern

Coding Blocks School of Technology (CBSOT) | Jun 2026 — Present

Working on AI/ML and Data Science projects with hands-on experience in building and deploying ML models.

SKILLS

Languages & Frameworks: Python, LangGraph, Streamlit, Flask

Machine Learning & NLP: TensorFlow, Keras, Sentence-BERT, Cosine Similarity, Classification, K-Means Clustering, Clinical

Generative AI & LLMs: LLM Fine-tuning (LoRA/QLoRA), Groq API, Gemini API, Agentic AI

Data & Visualization: Pandas, NumPy, Recharts, ReportLab, Custom SVG Charts, Google Colab

Tools & Platforms: GitHub, Google Colab, Kaggle, Streamlit, Docker, Firebase

KEY PROJECTS

AI Content Writing Agent

Agentic AI system for generating LinkedIn posts, About sections, and GitHub READMEs. Built with LangGraph for routing and Groq for generation. Mentor: Aryesh Rai Sir.

LangGraph • Groq API • Content Generation

Health Report Prediction Model

Clinical NLP project predicting diagnoses from text and demographic features using Sentence-BERT embeddings and hybrid Keras model. Published on GitHub with demo.

Sentence-BERT • NLP • Keras • Streamlit

YouTube Notes Agent

Converts YouTube videos/playlists into multi-format PDF notes (bullet, Cornell, outline, mind map, Q&A, narrative). Built with Gemini API, youtube-transcript-api, and ReportLab.

Gemini API • ReportLab • Flask • Docker

Customer Churn Prediction

End-to-end ML pipeline with data cleaning, EDA, classification, and K-Means segmentation. Four-notebook pipeline in Google Colab.

Pandas • Scikit-learn • K-Means • Colab

Personal Money Manager

Standalone HTML web app for personal finance tracking with INR currency support, custom SVG charts, and Gemini AI coaching.

HTML/CSS • SVG • Gemini API • Finance

KrishiSetu-Q (Smart India Hackathon 2026)

Farmer procurement slot booking & queue management platform. Team: Yuva Codes. Problem Statement 26032 (Ministry of Consumer Affairs, DoCA).

Problem Solving • Full-Stack Development

CERTIFICATIONS & LEARNING

- Google/Coursera — Introduction to AI Course Certificate
- Deloitte — Cyber Job Simulation Certificate (via Forage)
- Structured Learning: 100 Days of ML, 60-day AI Engineering Roadmap, Interactive ML Dashboards

ADDITIONAL INFORMATION

Interests: Machine Learning, Deep Learning, NLP, Generative AI, Agentic AI, Cybersecurity

Approach: Project-based, self-directed learning. Builds in public on GitHub with structured learning paths. Iterative approach to refinement and optimization.
